gratis · komen LOGO

LOGO LU JADI 3D.

Dulu animasi logo 2D aja makan 2 hari di After Effects, versi 3D nggak pernah gue ambil. Sekarang 1 perintah ke Claude Code: logo diubah jadi objek 3D beneran, muter pelan, cahaya studio, langsung jadi video. Perintahnya pakai bahasa Inggris biar hasilnya paling akurat.

PART 1 · PERINTAH UTAMA (APA · BAHAN · HASIL)

logo-3d.txt

```
Build a 3D animation of my logo using Three.js in a single
HTML file.

BAHAN (input): my logo file is in this folder: [logo.svg
or logo.png]. If it is a PNG, trace the shapes into clean
```

03 · Emas (gold)

MATERIAL: polished gold. Metalness 1, roughness 0.12, base color #F1C16B. Accent part stays my brand color as glossy plastic with clearcoat.

04 · Clay

MATERIAL: soft matte clay. Metalness 0, roughness 0.85, no clearcoat, slight sheen. Warm cream for the main shape, my brand color slightly lighter for the accent.

05 · Holo

MATERIAL: holographic foil. Metalness 1, roughness 0.12, iridescence 1, iridescence IOR 1.8, thickness range 180-400 nm. Use a contrasty environment so the colors show.

CARA PAKAI

1. Buka **Claude Code** (tab Code di aplikasi Claude), pilih folder project.
2. Taruh file logo lu (SVG paling bagus, PNG juga bisa) di folder itu.
3. Salin **perintah utama**, ganti nama file logonya, kirim.
4. Mau gaya lain? Tambahin **1 blok gaya** di akhir perintah, kirim lagi.
5. Kurang pas? Minta satu-satu: "make it rotate slower", "less glow", "bigger bevel".

Catatan jujur: butuh Claude Code (bukan chat biasa) biar bisa baca file logo dan render video. Logo yang bentuknya rumit (banyak huruf tipis) kadang perlu 1–2 kali perbaikan. Pakai logo lu sendiri atau yang lu punya izinnya.
