3 ATURAN. 10 PERINTAH.

Sebagai desainer, brief paling nyebelin itu "bikinin yang keren". Ternyata gue ngelakuin hal yang sama ke Claude, dan hasilnya ngaco. Sekarang tiap perintah gue selalu punya 3 bagian ini. Perintahnya pakai bahasa Inggris biar hasilnya paling akurat.

3 ATURAN

01 · APA

Tugasnya apa, satu kalimat jelas. contoh: "Turn my clip into a 30-second vertical short."

02 · BAHAN

Bahannya di mana: nama file, folder, warna, teks. contoh: "The clip is in the footage folder."

03 · HASIL

Maunya kayak apa: ukuran, gaya, format, disimpan di mana. contoh: "9:16, word captions, MP4 in the hasil folder."

✕ PERINTAH NGACO

make me a cool video

✓ PERINTAH KEPAKE

Cut my clip into a 30-second vertical short. The clip is in the footage folder. 9:16, word captions, save to hasil.

10 TEMPLATE PERINTAH (GANTI BAGIAN [KURUNG])

01 · Klip podcast jadi video pendek

APA: Turn my podcast clip into a vertical short (20-30 seconds) with the most exciting part.
BAHAN: The clip is in the footage folder: [FILE NAME].
HASIL: 9:16, speaker's face always centered, word-by-word captions in the original language, key words highlighted,

sound effects on cuts, zoom on strong lines. Save as MP4 in the hasil folder. Show me which part you picked and why before editing.

02 · Logo jadi animasi

APA: Animate my logo into a 5-second intro.
BAHAN: My logo file is [FILE NAME] in the contoh folder. Brand colors: [HEX CODES].
HASIL: The logo builds piece by piece, settles with a soft bounce, then holds for 1 second. 1080x1920 and 1920x1080 versions, MP4, saved in the hasil folder.

03 · Teks gerak 10 detik

APA: Make a 10-second kinetic typography video.
BAHAN: The text: "[YOUR SENTENCE]". Font: [FONT NAME]. Colors: [HEX CODES].
HASIL: Words pop in one by one in sync with a steady beat, the key word is bigger and in the accent color. Vertical 9:16, MP4, saved in the hasil folder.

04 · Caption buat video yang udah jadi

APA: Add word-by-word captions to my finished video.
BAHAN: The video is [FILE NAME] in the footage folder. Language: [LANGUAGE].
HASIL: Captions in the lower third, max 3 words on screen, the spoken word highlighted in [COLOR]. Keep the original audio. Export MP4 to the hasil folder.

05 · 5 cover / thumbnail sekaligus

APA: Design 5 different cover options for my video.
BAHAN: Video title: "[TITLE]". Best frame: [FILE NAME or timestamp]. Brand colors: [HEX CODES].
HASIL: 1080x1920, big bold title readable at small size, one strong visual each, consistent brand style. Save as PNG files cover-1 to cover-5 in the hasil folder.

06 · Naskah voiceover 20 detik

APA: Write a 20-second voiceover script for a short video.
BAHAN: Topic: [TOPIC]. My audience: [WHO]. One personal experience: [YOUR STORY + A NUMBER].
HASIL: Open with my experience in the first 2 seconds, then 3 numbered tips, end with "comment [KEYWORD]". About 55 words, casual tone, short sentences. Give me 2 versions.

07 · 30 ide konten sebulan

APA: Plan 30 content ideas for the next month.
BAHAN: My niche: [NICHE]. What already performed well: [2-3 EXAMPLES].
HASIL: A table with date, hook (max 8 words), format (reel), key point, and comment keyword. Mix tutorials, results, and personal stories. Save as a spreadsheet in the hasil folder.

08 · Palet warna dari logo

APA: Build a brand color palette from my logo.
BAHAN: Logo file: [FILE NAME] in the contoh folder.
HASIL: 1 primary, 1 accent, 2 neutrals, 1 background, each with hex code and where to use it. Check text contrast. Save as a one-page PNG and a .txt with the codes in the hasil folder.

09 · Mockup produk

APA: Put my design onto realistic product mockups.
BAHAN: Design file: [FILE NAME]. Products: [e.g. t-shirt, mug, phone screen].
HASIL: 3 mockups per product, clean studio lighting, neutral background, 1080x1350. Save as PNG in the hasil folder.

10 · Rapihin ratusan file

APA: Organize and rename all files in this folder.
BAHAN: The messy files are in [FOLDER NAME].
HASIL: Sort into subfolders by type (video, image, document), rename as [DATE]_[PROJECT]_[NUMBER]. Show me

the plan first, don't delete anything, and give me a list of every change.

CARA PAKAI

1. Pilih template, klik **Salin**.
2. Ganti semua bagian **[KURUNG]** pakai punya lu.
3. Tempel ke Claude. Yang butuh file (video, logo) jalannya paling enak di **Claude Code**.
4. Kurang pas? Tambahin satu kalimat di bagian HASIL, jangan tulis ulang semuanya.
